

How to make your own **Dr. Jargon Playing Cards**

1. Download this PDF
2. Print out the game on heavy white cardstock.
For best results use a colour printer.
3. Cut the cards to size using a large paper cutter.
the more precise you are, the easier they will be
to handle later.
4. Shuffle cards.
5. Enjoy your new Dr Jargon cards game!

Instructions

Compete to describe key conditions and treatments to your team in jargon-free and child-friendly language.

Suitable for 3-8 players.

The Cards

Key Word at top of each card. Jargon Words beneath.

Set up

Choose 2 equal teams. Put timer on table and card deck face down.

Gameplay

1. Team 1 selects a player to act as **Jargon Buster** and start the game.
2. Jargon Buster selects the top card, keeping it hidden from their teammates. They should look at the card and allow Team 2 to also see it.
3. Start the timer (1 min). Team 1 must try to guess as many Key Words as possible in 1 min.
4. The Jargon Buster then describes the Key Word to teammates using child-friendly language. They must not use any Jargon Words from the card.
5. Team 2 listens for Jargon Words. If they hear any jargon, or other words they feel are not child-friendly, they should shout "JARGON" – this means Team 1 are busted!
6. If they are busted, the card goes to the bottom of the pack. They must select the next card and describe the Key Word.
7. If their team mates guess the Key Word, they win the card.
8. Jargon Buster continues selecting cards and describing until 1 min expires. Play passes to Team 2, who now select their first Jargon Buster.
9. Teams keep taking turns - make sure everyone has the chance to be the Jargon Buster.

Winning

The team who has won the most cards at the end wins!

Rules for the Jargon Buster

- Child friendly language only!
- No gestures, sounds effects or noises.
- No initials, abbreviations or parts of Jargon Words allowed.
- No use of "sounds like" or "rhymes with"

Only got 3 players? Play as individuals not teams – during each turn, have 1 Jargon Buster, 1 guesser and 1 checker. Then switch roles!
